U.S. Environmental Protection Agency Reviews Cleanup at the Combe Fill North Landfill Superfund Site

The U.S. Environmental Protection Agency (EPA) is conducting its sixth five-year review of the **Combe Fill North Landfill Superfund Site**, located in Mount Olive Township, New Jersey. This review seeks to confirm that EPA's cleanup plan documented in the 1986 Record of Decision remains protective of human health and the environment. The selected cleanup plan includes grading and compacting the waste disposal area, covering the landfill with clay to prevent surface water and rainwater from coming into contact with the buried waste, installing a system to collect drainage from the site, installing a ventilation system for the methane gas, and installing a fence around the site. EPA will continue to monitor the Site to ensure the cleanup plan remains effective.

A summary of the five-year review activities and an evaluation of the long-term protectiveness of the cleanup will be included in the five-year review report, scheduled to be completed in **summer 2024**.

What is an EPA Five-Year Review?

The purpose of five-year reviews is to ensure that implemented cleanup plans at Superfund sites function as intended and continue to protect people's health and the environment. These regular reviews, which are required by federal law when contaminants remain at a site, include:

- Inspecting the site and cleanup technologies;
- Reviewing monitoring data, operating data, and maintenance records; and
- Determining if any new relevant regulatory requirements have been established since EPA's original cleanup decision was finalized.

When will EPA's Five-Year Review Report be available?

It is anticipated that the five-year review report will be available at the website noted below by in **summer 2024**.

For more information

The Administrative Record, which includes EPA decision documents used for selecting the cleanup plan, is available for public review at the information repository listed below. Project information is also available online at the website noted below.
